Aluminum-Plastic & Plastic Laminated Tube Production Line

1. LAMINATED TUBE PROCESSING EQUIPMENT

TT-TM 80 Laminate Tube Making Machine is the tube processing equipment which has been developed by combining foreign and domestic technologies in the packaging industry. We are new company providing solutions for both ABL and PBL tube industry.

Basic Technical Parameters:

Power Supply:	220VAC/50Hz
Power:	20KW
Tube production Speed:	max 18 m/min, 100 pieces/min
Tube diameter	25-40 mm, 42-50, 12.7-22, customizable
Tube Length:	65-200 mm
Air Supply :	0.6Mpa, through oily water treatment
Water Supply Requirement:	Water Pressure>0.2Mpa, Flux 5-6 , litre/min Temperature<20 ° C, soft water
Size:	2800*1900*980 mm
Weight:	1800 kg

* Note:All-plastic laminated welding equipments are required.

2. MOLDING EQUIPMENT

This production line uses plastic injection molding equipment for the injection molding of laminated tube shoulders. This machine uses screw preplastication mold closure completely by hydraulic pressure, double mould alternative forming method, with hydraulic pressure pieces. It is highly efficient in production, easy and safe to work with. It produces smooth and cosmetically high quality shoulders.

Basic Technical Parameters:

Power Supply:	3*380VAC/50Hz
Power:	8KW
Production ability:	22-24 pieces/min
Size:	2300*1700*2800 mm
Weight:	1500kg
